

INSTALLATION MANUAL

VIRUS XL

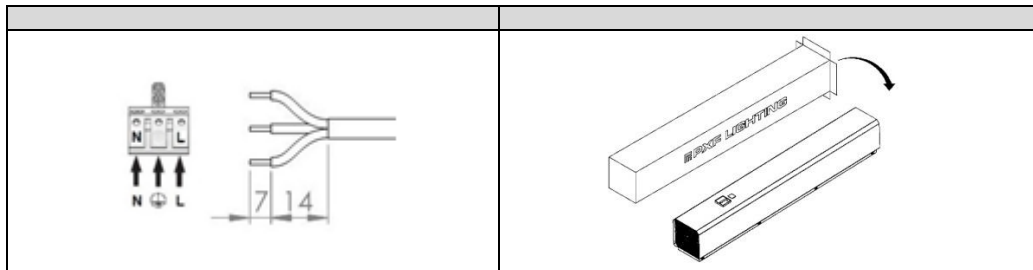

220-240V / 50-60Hz

Power [W]	L	W	H	A	B	P	R	Weight [kg]
2x15 / 3x15	1002	147	175	700	70	115	73	7
2x30 / 3x30	1462	147	175	1162	70	115	73	10

The luminaire comes with a mechanical filter and a timer. The UV light source has to be replaced every 8.000h according to the timer indications. Mechanical filter needs to be cleaned with a frequency depending on the room and usage. Office spaces would require a cleaning every 720h while dusty spaces every 360h. Filter has to be clean to provide a maximum airflow. In case of damage or wear the filter needs to be replaced.

Installation kit supplied with the luminaire does not include anchors for ceiling installation.

Important warnings:

The luminaries may be installed by qualified registered personnel only.
 Any manipulation inside the luminaire when the power is activated causes the risk of electric shock.
 The manufacturer is not responsible for any flaws resulting from non-compliance with these instructions.
 The manufacturer reserves the right to change the construction of the product.
 Do not install the luminaire in places without sufficient air circulation.
 To guarantee safe luminaire functioning, please follow the instructions in the installation instructions.
 PXF Lighting website: www.pxf.pl

The European Directive 2002/96/EC on waste electrical and electronic equipment, requires that electric and electronic devices must be disposed of in the normal household waste. The crossed out wheeled bin is reproduced in order to remind obligations towards separate collection. For correct disposal, please use authorized waste disposal facilities or return to the distributor at the date a new lighting fitting is purchased. Lamps, if disposed together with the lighting fitting, shall not be broken up since they contain substances which are highly polluting to the environment. Unauthorized disposal of the foregoing waste material is punishable by law.
